

# Quick Reference – Selecting an Alfalfa

Imperial Seed Premium Alfalfas are grown and processed in Western Canada. These varieties each have unique characteristics and are selected from elite alfalfa breeding programs with many years of research behind each variety. When ordering from Imperial Seed, trust in knowing the alfalfas are pre-inoculated and ready for seeding either alone or in blends. There will be an inoculant tag on each bag identifying this process. We do not apply any other coatings to our alfalfa seed.

Alfalfa		Main features	One comment
<b>Stellar II</b>	<i>New 2021</i>	<ul style="list-style-type: none"> <li>• High quality fast regrowth</li> <li>• Earlier maturity, well suited to grass blends</li> <li>• Top variety</li> </ul>	<ul style="list-style-type: none"> <li>• When it's all about yield</li> </ul>
<b>AAC Trueman</b>	<i>New 2020</i>	<ul style="list-style-type: none"> <li>• Extensive rhizomatous deep root structure</li> <li>• Persistence in most soil conditions including poorer drained soils</li> <li>• Developed in Canada, adapted to our growing conditions</li> </ul>	<ul style="list-style-type: none"> <li>• Exceptional persistence</li> </ul>
<b>Boost HG</b>	<i>New 2020</i>	<ul style="list-style-type: none"> <li>• Hi-Gest™ Alfalfa Technology</li> <li>• Improved fiber digestibility and forage quality</li> <li>• Elite yield</li> </ul>	<ul style="list-style-type: none"> <li>• Yield and quality</li> </ul>
<b>Synergy Alfalfa Blend</b>		<ul style="list-style-type: none"> <li>• Multiple certified varieties</li> <li>• Combines unique features of each alfalfa for improved adaptability</li> <li>• Suitable for most alfalfa growing situations</li> </ul>	<ul style="list-style-type: none"> <li>• Adaptability and performance</li> </ul>
<b>Imperial Select Alfalfa Blend</b>		<ul style="list-style-type: none"> <li>• Top seller</li> <li>• Performance and quality</li> <li>• Multiple alfalfas</li> </ul>	<ul style="list-style-type: none"> <li>• Adaptability and value</li> </ul>
<b>Challenger Brand</b>		<ul style="list-style-type: none"> <li>• Excellent forage yield potential</li> <li>• Improved germination in saline conditions</li> </ul>	<ul style="list-style-type: none"> <li>• Increased salt tolerance</li> </ul>
<b>Mustang Brand</b>		<ul style="list-style-type: none"> <li>• Creeping root</li> <li>• Strong performance under dryland conditions</li> <li>• Long term alfalfa for pasture or hay</li> </ul>	<ul style="list-style-type: none"> <li>• Performance under dryland conditions</li> </ul>
